

Cleanroom-friendly, wet & dry.

The VHS110 CR is the innovative Wet&Dry single phase vacuum cleaner for cleanroom. The GMP design and the stainless steel execution make it extremely easy to clean and sanitize.

The ULPA15 downstream filter installed on all the CR machines avoids contamination of the cleanroom area by the unit, as well the optional upstream HEPA14 or ULPA15 filter secure the highest filtration efficiency in case of very fine dust.

The innovative PullClean system allows an effectively cleaning of the M Class star filter while the vacuum is running, without need to stop it.

The unit can be easily upgraded with optional mechanical floater to stop the vacuuming when the maximum level of liquid is reached in the 37 liter capacity container.
